Expand QuickScreen 2 displays the message in two directions

Simplicity, quality and stunning images – these advantages have turned Expand QuickScreen into a big hit with marketing and sales people all over the world.

Expand QuickScreen 2 extends the product line with the benefit of displaying your message in two directions. Separate images mean even greater flexibility, since the images can be used together or independently. As usual, images can easily be replaced.

Expand QuickScreen 2 is as versatile as the single-sided version. Customer presentations, conferences, roadshows and in-shop activities are only some examples of where this marketing tool comes in handy. The double pictures make for an effective use of available floor space.

Expand QuickScreen 2 weighs only 7.2 kilograms, graphics and padded nylon bag included. The image area is 850 mm or 1000 mm wide, each width is available in heights of 2000 mm or 2180 mm. Colour is black or silver.
